

Pause Beacon's Lorneville Data Centre

Saint John–St. Croix NDP ■ Peace and Friendship Treaty territory ■ Their Gas. Our Wetlands. Our Choice.

Beacon AI Centers (Calgary) and VoltaGrid (Texas) are proposing a 390 MW data centre at Lorneville — 190 MW from an on-site gas plant, 200 MW from NB Power's grid — with no disclosed anchor tenants, no meaningful consultation, and the destruction of wetlands and old-growth forest on Peace and Friendship Treaty territory. Pause the project until our community has a say.

"I call on the federal government to pause the expansion of AI data centres in Canada — starting with Beacon AI Centers' proposed 390 MW campus at Lorneville, Saint John — until meaningful community consultation, environmental assessment, and democratic oversight have taken place. Our energy, our wetlands, our water, and our data sovereignty must serve Canadians first."
